Location at the Heart of Problems faced by Indian Outbound Travelers: Destination Understanding and Integrated Trip Planning Solved for User Pain Points

Problem Statement

1 Paradox of Choice

12lakh+
International accommodations and over 1 lakh domestic ones on MMT adds to users' decision fatigue and planning delays

~74% consumers
Walk away from intended booking because of overabundance and complexity of options
As per a global **Accenture research**[1]

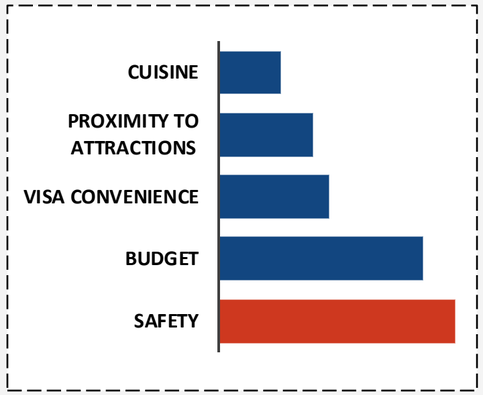

Source: Accenture Global Research

2 Lack of Destination Understanding

55% Travelers
Struggle with finding information about the location, to understand what cities are worth visiting and how to optimize travel options

30% Respondents
Prioritize Safety as the number 1 factor for choosing destinations, followed by Budget Constraints and Visa Convenience

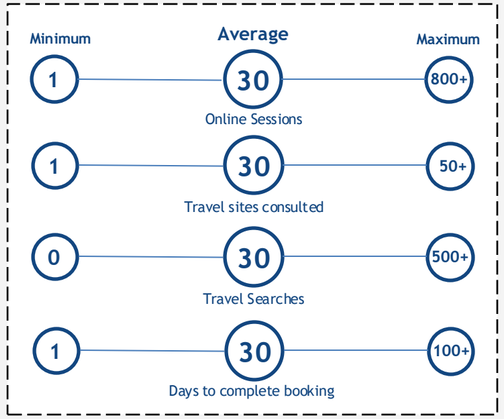

Source: Primary Research; N=68 Respondents

3 Infinite Paths to Purchase

20+ sources[3]
Used by an average traveler from planning to booking leading to a **disjointed**, **time-consuming** and **stressful** trip planning experience for many.

66% respondents[4]
Dissatisfied by planning options available today

Source: Bain, Google and Dynata Travel Study (n= 8901)

Opportunities for Travel Booking

make my trip

80 Million

Source: McKinsey Research

70%
Travelers who prefer Personalized Trip Planning and 62% are willing to pay extra for tailored preferences
MMT can offer hyper-personalized trip plans powered by user behavior, preferences converting interest into premium bookings
Source: Zipdo Marketing in the Travel Industry Statistics

$28 Billion
Opportunity Presented by **GenAI** for the travel Industry due to personalization emerging as a key need of travelers
MMT can unlock value by delivering tailored itineraries and destination insights at scale using GenAI
Source: Skift Research (2024)

Maps
Most Used **Planning Tool** across all travelers to scope destinations, locating hotels and activities (**96% of Travelers**)
MMT can integrate smart maps to provide visual travel planning for city, hotel, and experience discovery
Source: Accenture: The travel industry's new trip (2023)

User Personas

	Description	Use Cases	Pain Points
	• **Indian Family of 4** planning an International Trip to Bali • **Vishal, The Husband:** A pure vegetarian planning the trip	• **Safety Considerations** of the city and property for his wife and kids • **Availability of Veg Indian Food** around the property • **Proximity to Top Attractions** • **Faces Lack of Time,** wants one unified platform	• **Lack of Destination Information including Family Friendliness and Indian Food** • **Multiple Platforms for the booking process**
	• **A group of friends** planning to attend a concert in Dubai • **Seerat, a 26-Year-Old:** A Type A personality wants to map out what cities and attractions to cover	• **Proximity** of Property to **Concert Location** • **Route Mapping** for the trip including activities, party places and restaurants • **Community and Socials** to see influencer recommendations • **Group Planning Features** to take the advice of group	• **Lack of Route Mapping Feature based on Proximity to Concert** • **Limited Customization Options Available** • **Lack of Group Planning Feature**

User Journeys Reveal Seamless Trip Planning Missing for Indian Travelers: Fragmented Tools, Vague Context, and Lack of Personalization Undermine Confident Decision-Making

Intent	Discovery	Filters	Offering	Booking
Blank slate, new plans	On their way to **check out bundles** – so many ! But this isn't the way we saw it on Insta	Would the kids be alright here ?	*Should I book using my corporate ID for better discounts ?*	**Disaggregated Booking** Experience on the Bundles
			Let's go out on a road trip across	
Family trip Bali" leads to a *blank search box,* and a plethora of Google Results	Scrolling through hundreds of list-view hotels with no intuitive context on vibe or safety. *Will Vishal get his Veg food ?*	Applying basic filters still doesn't answer the crucial question: *"Will my family feel comfortable here?"*	Sees a car rental option, and a bunch of bundles, can't we change a few things in the trip bundle ? *wonders Vishal*	Ends up booking flights, hotel, and car separately—a series of transactions, not a unified experience
On her way to a concert, looking out for places to book a place near the venue to go with her friends	Opens 10+ hotels, trying to *decipher the "vibe"* cross-referencing the internet, but hey at least the hotels are there here.	Filters by price and rating, sends *screenshots* to chaotic group chat, refreshes the page to *see the filters gone*	She books for everyone, after scrolling from District and back, chases others for payment and hopes all details are right.	A stressful, individual transaction for a group event. Only time will tell where they'll reserve their brunch at
	Searching about on the internet to **check out the vibe** of the place	Checks out the map but there's no way to anchor around without **a sea of dots on screen**	**Switches back and forth between 2 apps** trying to figure something out	Can't split the bills, **modularity is a question**
It's concert time! Coldplay is finally here !				

Disaggregated Journeys: Unified Bookings cross platform not available

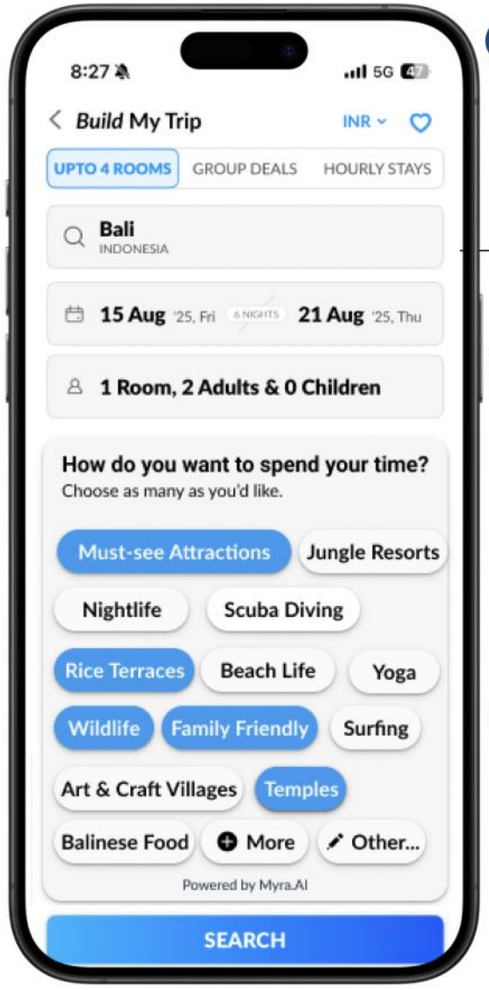

Quantifying the Vibe & Trust: A 5-Star near clubs might not exactly be the chill outing we expected

Confusing Maps & Filters: Too many options, too many filters, too much time.

Making Inspiration Actionable: Chasm between travel inspiration on social media & their ability to act on it within our product

Visualization of Inter-City Trips Using Maps and Personalization with Gen AI Hits the Sweet Spot in Solving for User Pain Points

1. Interest Capture

1. **Vibe Capture Box** powered by Myra.AI helps users articulate their needs better to match them with far more accurate travel recommendations.

2. Myra.ai kicks off the city selection process by first creating a **personalized list of recommended cities** based entirely on your interests and preferences in travel history.

3. Get **holistic city rating** and an **average price guide**, with info aggregated from property data across our entire network of MakeMyTrip affiliate partners and publicly available data.

2. Trip Itinerary Recommendation

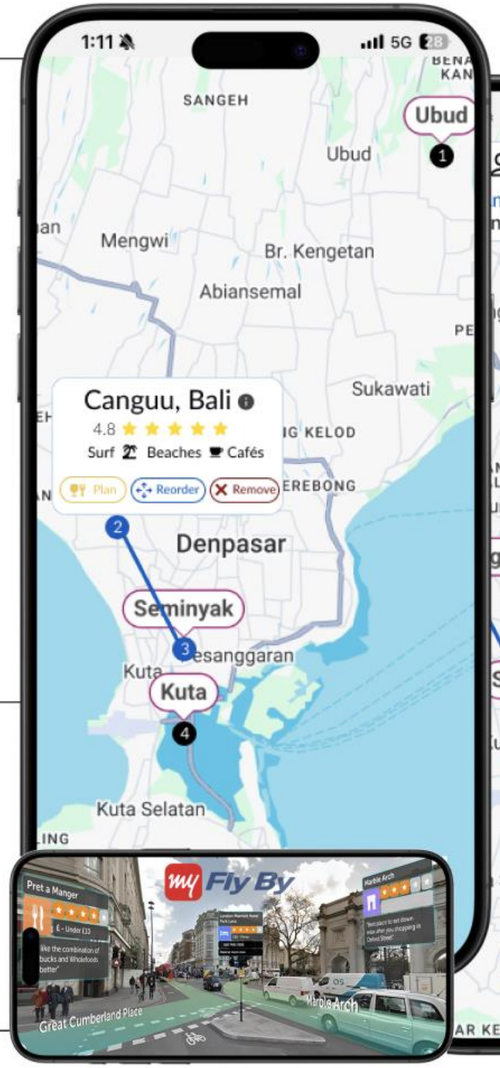

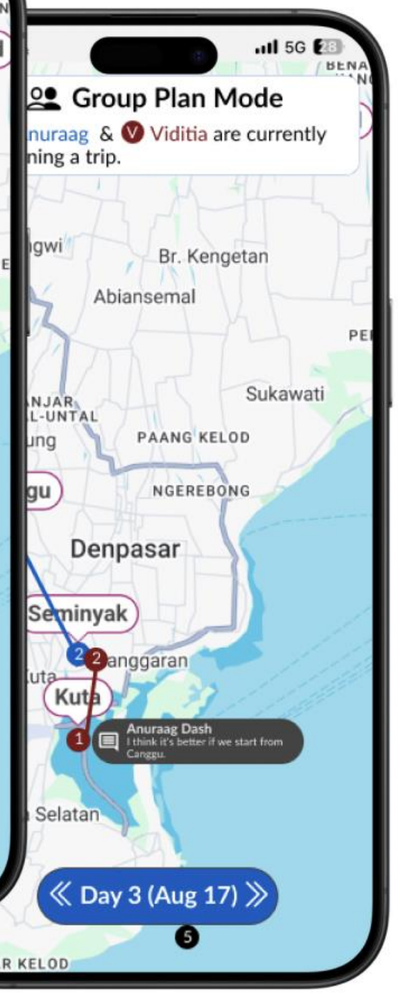

4. Switch to the **map view** to visually plan your entire intercity journey. From there, you can explore all your transportation options, **book your preferred travel directly with MakeMyTrip**, and easily adjust your itinerary by dragging and dropping your destinations.

6. Collaboratively build the perfect itinerary in real-time in Group Plan Mode. Create and edit shared routes, add suggestions to the group itinerary, and leave comments on planned stops.

7. Creates cinematic, instantly shareable video previews of road trips and journeys with **FlyBy.** FlyBy automatically generates a stunning, map-based animation that traces your route from start to finish.

3. Map Based Exploration of Trip

Heatmaps Summarize the Vibes of Properties and Maps-Based Trip Planners Aggregate Recommendations in Itineraries

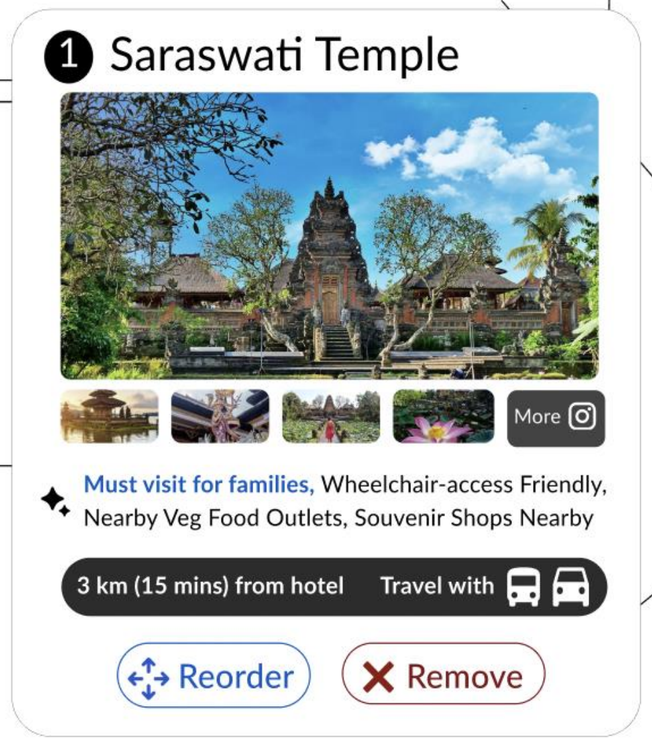

4. Intra-City Itinerary Recommendation

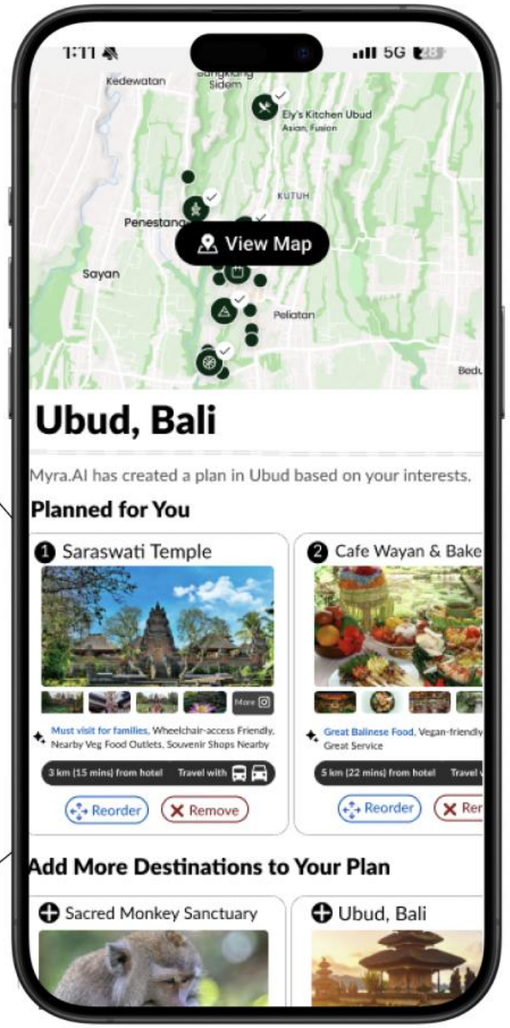

8 Myra.ai analyzes public reviews and articles to generate a **concise summary of that location's key characteristics**. These summaries helps save you from diving into endless reviews or scattered info.

9 See **contextual travel information** about each location, such as available transportation. Once you decide how you want to get there, **book your cab, bus, or train directly through MakeMyTrip within your itinerary**.

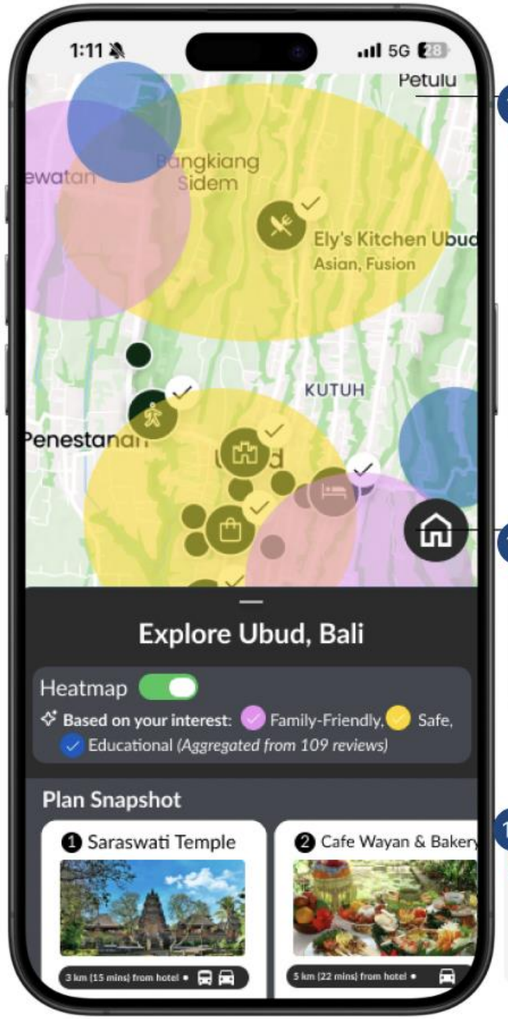

10 While Myra.ai provides a suggested itinerary, users are in **full control.** Add new places, remove stops, or reorder the entire plan.

11 To give you an authentic view, we display recent **public photos** for each destination sourced from **social media apps** like Instagram and Facebook using relevant hashtags.

5. Intra-City Map-Based Discovery

12 **Heatmaps** let you instantly spot the properties, hotspots, and neighborhoods that match your trip's vibe.

To create the heatmap, Myra.AI sifts through thousands of **MMT customer reviews,** performs **sentiment analysis** to understand the *feeling behind the reviews*, parses through **public map data**.

13 Hit the **Home button** to snap the map back to your trip's anchor. Whether you're concert-bound or exploring nearby spots, it keeps you focused on what brought you here in the first place.

14 See your trip in a city at glance in the **plan snapshot**. Click any tile to shuffle your itinerary, dive deeper for more details, or even **book instantly through MakeMyTrip**.

KPIs & Growth Plans: Unify Map-led Planning, Influencer Engagement, and Strategic Partnerships

Metrics

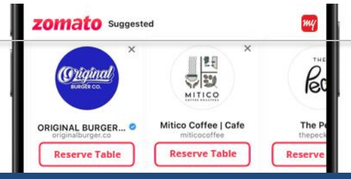

Map-Led Conversion: % of users who initiate their journey on map & book within a 7-day window

Average Revenue Per Planner (ARPP): Avg. Basket Value per unique map planners

Immersive Discovery Rate: % of sessions with interactions with both Vibe Gauges & FlyBy

Flywheel Attachment Rate: % of map-led bookings including a partner add-on (Zomato/TM)

Influencer Reverse Search Conversion: % of users booking after being directed from an influencer's content.

Anchor Point Travel Multiplier
*Concert goers, MMTBiz Bleisure users pose a **$43M+ yearly revenue opportunity (GBTA'24)***

Acquiring Intent Partnership Gateway
*Taps into the Global Events Market (e.g. Sport Tourism) an **$82M annual potential**. (EY'24)*

The Food FlyWheel – Indian & International
*Partner with Zomato with an int'l presence to tap into a **~$12.7M Revenue Potential** (TOI, Fortune'24)*

Be at the forefront of the Internet
*Tap into viral user created engagements with a potential **150M+ Online reach**.*

Influencer Led Modular Planning
*Tap into a revenue potential of **$30+M annually** with **1M+ Viewer Engagements** (Mordor'24)*

OPPORTUNITY AREAS AND BUSINESS PLAN

CONCERT BUNDLING WITH DISTRICT, BMS & TICKETMASTER — **$2.6M/ Mo.**

- A Lollapalooza (major concert) alone gets 15,000 travelers at 25% conversion that's *3,750 bookings * ₹15,000 = ₹5.6 Crore ($675,000)/wknd.*
- Partner gets a call-out on MMT routing travelers there.

PARTNERSHIPS WITH RESTAURANT AGGREGATORS — **1.3M Users**

- **MMT-Zomato** integration creates a virtuous flywheel of engagement **to increase user stickiness across both platforms – 1.3M User gain** @ 2% conversion *(Mordor'24)*

INFLUENCER LED REVERSE SEARCH BUNDLES — **$3B TAM**

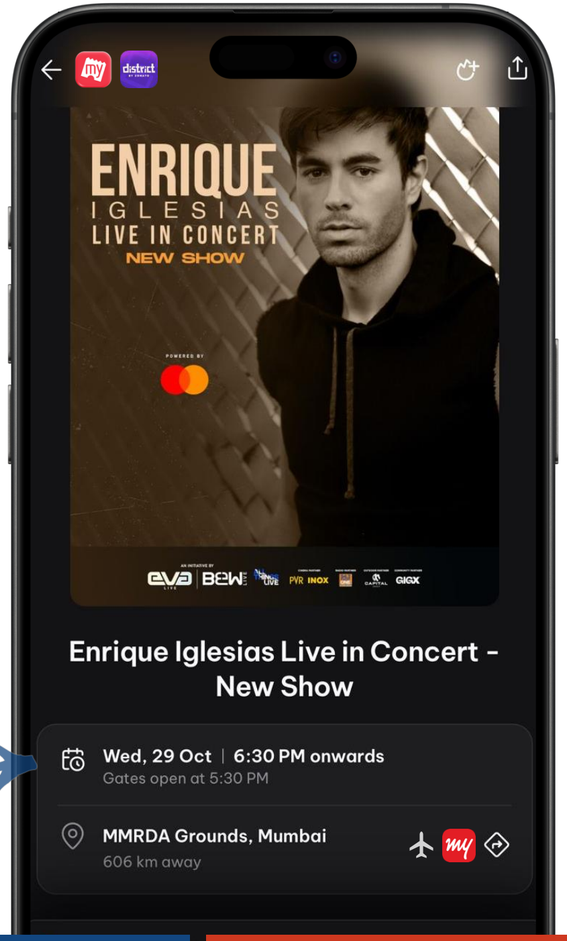

- Offer **plans based on influencer tour guides –** Inspiration to Itinerary guides to capture the GenZ Indian **Base who trust influencers 78% more than digital marketing** *(McK, Meta'25)*

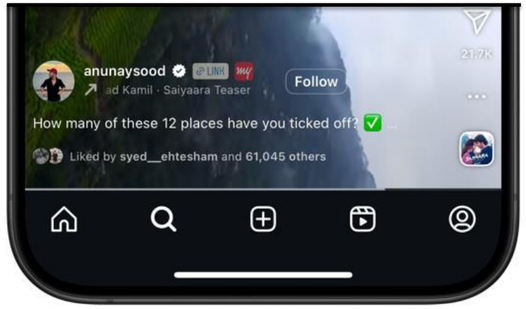

GROUP PLANNING & MODULAR PACKS — **+20% Conv.**

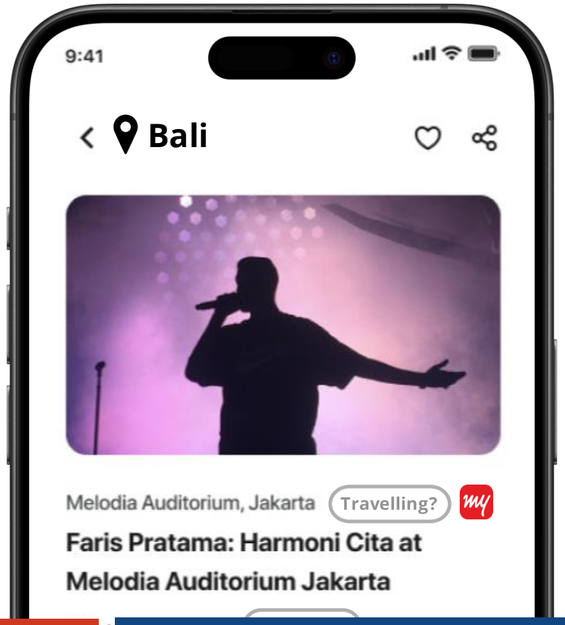

- Allow users to plan multiple trip routes with approvals.
- **Granular Bookings** – allowing billing small items than a larger 5+ person trip plan that seems daunting, *(Phocuswright'25)*

A more social café hunting experience while trip planning with Influencers

Plan out trips right off the **users' first touchpoint** on BMS/ District

GOING DIGITAL	• **80%** of Indian business travelers **expect digital flows ; 84%** of small business leaders state that business travel is essential for retention	**336M Biz**

71% of brands **predominantly use Instagram for campaigns** (OPA,'23)

3% Smaller Influencers have an engagement rate of 4% > than the 1% Rate for Macro

Mega influencers *(>1M followers)*	 **@tanyakhanijow**	• **Followers:** 1.2M • **Average engagement**: ~5.49% (Outlier)** • **Type of content:** Solo travel, sustainability, known for detailed, practical vlogs. Can demo the "Safety" features for The Planners and the "Discovery" features for The Experience Seekers	 **@anunaysood**	• **Followers:** 1.3M • **Average engagement**: 5-8% (Outlier)** • **Type of content:** Stunning visuals, amazing engagement – perfect for Vibe Gauge & Fly By Experiences
Macro influencers *(100K-1M followers)*	 **@larissa_wlc**	• **Followers: 821K** • **Average engagement**: ~1.52%** • **Type of content:** A GoPro ambassador with a focus on adventure, lifestyle, and off-beat travel. Perfect for FlyBy Demos, Events	 **@ronnie_and_barty**	• **Followers: 121K** • **Average engagement**: ~1%** • **Type of content:** This travel couple focuses on road trips and hiking. Ideal for creating relatable content showcasing the social sharing

Appendix: Feature Packs & Tech

Tech Element	The "What"	The "Why"	Is it really that important ?
1. Unified Caching Layer	A sub-second, intelligent caching system across the entire app *(CDN, Redis, Client-Side)*.	**Utility: Eliminates today's ~7-second map load times**, wiped filters, and general app sluggishness. **Keep the filters intact on maps**	**53% of mobile users abandon sites that take longer than 3 seconds to load.** This is our single biggest conversion lever going maps first *(Source: Google, 2018)*
2. Headless CMS	**Decouples content (text/images) from the app code,** enabling real-time updates.	Allows marketing to **instantly update City Snapshots or influencer content and verification** without a slow, costly app release cycle.	Agile marketing teams see **30% faster campaign launches.** A Headless CMS provides this agility for our content-driven features. *(Source: Contentful, 2022)*
3. FlyBy Generation Engine	Creates cinematic, **instantly shareable** video previews of road trips and journeys.	Turns a **user's plan into a viral, "Instagrammable" asset**, generating free marketing and social proof that drives new user acquisition.	Consumers find **User-Generated Content (UGC) 2.4x more authentic** than brand content. FlyBy makes every user a potential brand ambassador. *(Source: Stackla, 2021)*
4. Geospatial Database Engine	A high-speed database that understands physical space and relationships between places.	**Solves anchor point planning** (e.g., "Find a hotel *near* the venue *with* a metro station *and* late-night food").	**Location-based services are projected to be a $185B market by 2026.** Owning this query layer is critical. *(Source: MarketsandMarkets, 2021)*
5. Vibe Scoring ML Engine	Python (spaCy, scikit-learn), Transformer models that read reviews to generate a single, reliable "Vibe Score."	Powers the entire Vibe Gauge, transforming noisy, unstructured user feedback.	**71% of consumers expect personalization.** Our Vibe Score delivers this, directly answering a user's unspoken need for a place that *feels* right. *(Source: McKinsey, 2021)*
6. Custom Map Visualization Layer	A map that communicates *feeling*, via Vibe Pills and heatmaps *(Using Mapbox GL JS / Native SDKs)*	**Cures the "sea of dots" problem**, where users are paralyzed by choice and lack of context.	Visual data is processed **60,000x faster than text**, turning complex data into an instant "yes" or "no" for the user. *(Source: Vestergaard, 2019)*
7. Social Media Style Discovery	A familiar, engaging, full-screen format for deep-diving into a location's character.	Replaces tedious review-reading with a **snackable format** that builds emotional connection and trust.	This format leverages established user habits, boosting **in-app engagement by up to 15%** and making discovery feel intuitive, not like a chore. *(Source: Norman, 2013)*
8. Modular Booking Engine	Allows users to book "parts" of a trip (e.g., just one activity, one cafe) from a larger itinerary.	**Solves the high-commitment friction of booking an entire 10-day trip**, enabling smaller, more frequent transactions.	The **rise of the "micro-indulgence"** trend shows consumers favor smaller, accessible luxuries. This makes travel bookable in bite-sized pieces. *(Source: Mintel, 2024)*
9. Group Plan Mod	A dedicated, shareable micro-site for group trips with voting and expense tracking.	**Ends the chaos of planning group trips over WhatsApp** - friction point for our highest-value bookings.	**Over 60% of Gen Z travelers prefer group trips.** A tool that removes planning friction becomes indispensable to this demographic. *(Source: Klook, 2023)*
Down the Line : AR Engine with Visual Positioning	Fuses our rich data onto the user's world with pinpoint, real-world accuracy. (ARCore & ARKit)	Moves MMT from a pre-trip planner to an indispensable *in-trip* companion, creating unparalleled user dependency and a huge competitive moat.	Products with AR content see a **94% higher conversion rate.** AR Lens can turn every street and hotel into a potential point of sale. *(Source: Shopify, 2022)*
