frame (1): LEVELING UP REALITY

Another year, another camera bump. Smartphone innovation has plateaued
Screens keep us staring down when life is happening out there.
The inevitable future of tech is to fuse the digital and physical into a single, mixed reality. Seamless. Social. On your terms.

frame (1) by NOTHING is that leap. A lightweight, all-day mixed-reality eyewear that makes the physical world programmable and playful.

WRITING ON THE WALL

- **Smartphones have leveled out: more pixels but less presence.** IDC reports that worldwide smartphone shipments have been flat to declining since 2017, with 2023 shipments down 3.2% YoY
- **Human attention is diminishing under screen fatigue** A Microsoft Research study showed that task-switching triggered by screen notifications takes ~23 minutes to fully recover focus
- **AR filters & lenses show a behavioral shift** A Deloitte Digital report (2022) found that nearly 90% of Gen Z are interested in interactive AR (MIXED REALITY) experiences, using them for self-expression, learning, and shopping.

THE SOLUTION

LOOK SAY FLICK DONE

Your gaze anchors the UI. Your words trigger the action. Context appears exactly where it's needed—no menus, no clutter.

3-LAYERED ARCHITECTURE

CUSTOMER POV

Display & Optics

Next-gen Projection System: A 1440p display with 3,000 nits brightness.

Seamless Immersion: A 120-degree field of view and transparent lenses.

LUMUS (Projectors) WaveOptics (Waveguides) AVANTIER (Prism/Lenses)
Potential Partners

SEAMLESS BLENDING

Processing & Power

Ultra-Efficient Chipset: Consumes less than 1 watt, integrated into a 20-gram package.

Spatial Computing: The ability to understand and interact with real-world objects and surfaces.

Qualcomm snapdragon (Chips+Spatial Computing)
Potential Partners

ALL-DAY COMFORT

Interaction & Interface

Intuitive Controls: Hand-tracking and voice-assistant integration.

Authentic Design: No controllers needed, celebrating visible, honest engineering.

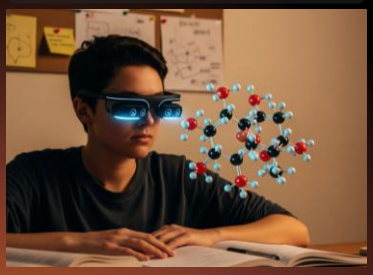

ultraleap (Hand tracking) MANOMOTION (Gesture Tracking) Doublepoint (Surface Interaction)

EFFORTLESS CONTROL

VISION FOR TOMORROW

frame your FOCUS

Zoom into molecules, spin a galaxy, or stick your ideas on an infinite wall. **Learning just got 3D.**

frame your SOUND

Play with ghost musicians, overlay sheet music in space, or jam with an invisible band. **Music just got magical**

frame your PATH

Streets light up, landmarks whisper stories, and your past runs leave glowing trails. **Exploring just got alive.**

frame your FLOW

Pin to-dos to your desk, float reminders above objects, or keep a heads-up workspace that moves with you. **Work just got fun.**
